

## Anglerfish Hat Craft

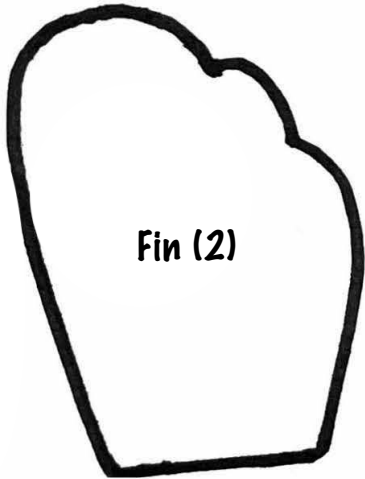

### SUPPLIES:

- cardstock for making the templates
- scissors
- pen or marker for tracing templates
- orange construction paper or cardstock
- white construction paper or cardstock
- 1 orange pipe cleaner
- 1 yellow tuft of felting wool (can also substitute a pom pom)
- glue or tape
- self-adhesive googly eyes (suggest 25mm or larger)

## INSTRUCTIONS:

1. Print Anglerfish Hat Templates (pg. 3) onto cardstock and cut out shapes.
2. Use cutouts to trace shapes onto appropriate colored paper and cut out:
  - 1 Head (orange)
  - 2 Fins (orange)
  - 2+ Teeth (white)
  - 2 Headband Strips (orange)
3. Stick googly eyes and teeth onto head to make anglerfish face.
4. Draw ridges onto fins and stick one fin to each side of the head.
5. For the light, tear and stretch the felting wool repeatedly so fibers interweave and stick together.
6. Stick the end of pipe cleaner through the wool. Bend end upwards so it grabs some of the wool and twist closed.
7. Stick the pipe cleaner to the back of the anglerfish head so the light hangs over the anglerfish face.
8. Stick one headband to each side of the head (on the back), aligning the bottom edges.
9. Stick the free ends of the headbands together to fit the child's head and voila—anglerfish hat!
